Tidewell Dispatch

Scheduling and dispatch for the trades

Seed round, target close January 2027

Jennifer (CEO) and Craig (CTO)

Toronto, Canada

The problem

Trades businesses run their day from a whiteboard

- A 12-technician HVAC shop in Mississauga booked every job on a whiteboard and a group chat
- Missed appointments, double-booked technicians, invoices sent days late
- Teams with 3 to 30 technicians are underserved: tools are built for solo operators or enterprise fleets

The product

Tidewell Dispatch

- Job booking and technician routing
- Quotes and invoices from the field
- Automatic customer texts: "your technician is 20 minutes away"
- $45 per technician seat per month

Traction

$1.29M ARR

September 2026 MRR x 12. Onboarding fees of $109K (last 12 months) shown separately

MRR grew ~9% a month

Compounded over the last 12 months; 4.9% over the last 3 months

211 customers

2,493 seats, September 2026

Unit economics

- 74% gross margin with customer success in cost of revenue (92% as booked)
- Fully loaded customer acquisition cost about $3,200
- Paid back in about 9 to 10 months

Retention

- Monthly logo churn 2.0% over the last 12 months, 1.6% over the last 6
- Net revenue retention about 88%, gross revenue retention about 81%
- Churn is highest in a customer's first 6 months: new onboarding programme targets that window

Market

- Bottom-up market sizing in progress: trades businesses with 3 to 30 technicians (Statistics Canada, US Census Bureau) x seats x price
- HVAC, plumbing, electrical, landscaping, pest control, appliance repair

Our largest customer

Northern Comfort Group

- 31-location HVAC franchise network
- 260 seats today, 9.7% of MRR
- Renews March 2027
- A 600-seat expansion has been discussed verbally: upside, not in our base plan

Competition

- Jobber and Housecall Pro: built for small crews
- ServiceTitan: built for large enterprises
- Spreadsheets, paper and group chats
- Why we win: built for teams of 3 to 30 technicians, with partner referrals from a plumbing and HVAC supply distributor

Team

14 people

- Jennifer (CEO): sales and fundraising
- Craig (CTO): product and engineering
- 6 software engineers, 2 account executives, 1 marketing manager, 3 customer success
- Both founders were software engineers at a large Canadian software company

The ask

$4M seed round

- About 22 months of runway on our plan, about 17 if growth stays at historical rates
- Our plan reaches $5.11M ARR by March 2028 (forecast)
- Product and engineering 45%, sales and marketing 40%, G&A 10%, reserve 5%
- Looking for a Canadian seed fund to lead

Thank you

Tidewell Systems Inc.
